

COURSE INFORMATION FORM	
Faculty / Institute	Faculty of Science and Literature
Department	Psychology
Course Code	PSİ 332
Course title	Psychopathology
Instructional Language	English
Programs that can take the course	Psychology
Course Type	Must
Course Level	Undergraduate
ECTS Credit	6
Prerequisites	PSİ 104 - Introduction to Psychology II
Course Content	This course will give a historical review of the field; concepts of normal and abnormal behavior; theoretical approaches to abnormal behavior; examination of the assessment, etiology and treatment of different types of psychopathologies as proposed in the DSM-V classification system. Contemporary and legal issues in abnormal behavior will be introduced.
The Aim of the Course	At the completion of this course, students will: (1) Have knowledge on the etiology, symptoms and treatment of various psychological disorders covered in the current classification systems, (2) Understand past and current treatment of psychological disorders, (3) Describe the research methods employed in investigating psychological disorders, (4) Appreciate the process of assessment of mental illness and the techniques employed in the assessment of personality and intelligence, (5) Understand the various theoretical perspectives defining the etiology of psychological disorders from biological, learning, sociocultural, psychodynamic ,behavioral and cognitive perspectives, (6) Have an appreciation of the inner side of psychopathology, the laws protecting the rights of the mentally ill and current issues in this area.
Course Outcomes	At the end of this course, students recognize the psychological disorders seen in adulthood and have information about their diagnosis criteria. They also know the historical development of psychological disorders' classification and current theories. Students will be able to explain the etiology, clinical manifestations, treatment and prognosis of psychological disorders.
